Choosing your first project

Practical digital and professional services to help your business operate better, make clearer decisions and grow with confidence.

Start here

Choose a service

What to keep

Specialist services for each stage of business

Putting it into practice

1. **Find the right support**

   A growing business often reaches a point where a specific piece of work needs attention.

2. **Understand the scope**

   Each service explains the intended buyer, the information we need and what we expect to hand over.

3. **Put the result to work**

   Better reporting can help managers investigate changes earlier.

4. **Pin down the decision**

   Use the service categories to identify a task you can define.

Worked example

A team with inconsistent sales figures starts with reconciliation before commissioning a dashboard.
