Activity and SIC mapping

We map up to six planned revenue streams to candidate activities and list questions for the filing agent.

Who it helps

UK founders and overseas owners

The problem to solve

A founder may describe activities by product name while the filing agent needs to understand how each activity generates revenue.

Working through the brief

1. **List planned revenue streams**

   Gather the agreed inputs. Your intended activities, ownership outline, residence and questions.

2. **Compare candidate activity codes**

   Track “Revenue stream” and “Candidate activity code” together so the reviewer can connect the source information to the result.

3. **Document questions for the filer**

   Use the mapping to explain the actual business model and put uncertain classifications to the filing agent.

4. **Check the scope at handover**

   Government, agent, address and bank charges are separate where applicable.

Worked example

A retailer also earns income from repairs. Record both activities before reviewing which published classifications describe them.
