Leadership offsite *facilitation*

We design and run one remote half-day workshop and deliver a decision log and 90-day actions.

Who it helps

Founders and managing directors

The problem to solve

An offsite can generate thoughtful discussion without a reliable record of the decisions leadership made.

Working through the brief

1 Agree the leadership questions

Gather the agreed inputs. Your strategic priorities, accountable leaders and intended decision dates.

2 Facilitate the half-day offsite

Track “Decision made” and “Action owner” together so the reviewer can connect the source information to the result.

3 Prepare decisions and actions

Use the decision log and 90-day actions to pick up the work after the meeting.

4 Check the scope at handover

Third-party data and work beyond the agreed business unit or market are separate.

Worked example

Two proposed priorities compete for the same resource. Put the decision and its owner on the agenda before the session.
