Strategy implementation *sprint*

We translate one approved strategy into three workstreams and lead two online progress reviews over four weeks.

Who it helps

Founders and managing directors

The problem to solve

An approved strategy can lose momentum when individual tasks are disconnected from the workstreams expected to deliver it.

Working through the brief

1. **Break the strategy into workstreams**

   Gather the agreed inputs. Your strategic priorities, accountable leaders and intended decision dates.

2. **Run two online progress reviews**

   Track “Workstream” and “Progress evidence” together so the reviewer can connect the source information to the result.

3. **Record blockers and next actions**

   Use the sprint record to expose dependencies and clarify what should be ready for the next review.

4. **Check the scope at handover**

   Third-party data and work beyond the agreed business unit or market are separate.

Worked example

A strategic priority stalls between departments. Define the first deliverable, owner and review point for the sprint.
